

Brainy Medic

Web application: complete feature list, portal by portal

Product	Brainy Medic: the mentor-led 90-day practice challenge
Portals	Student, Parent, Mentor, Admin (one login page, four roles)
Prototype version	0.6, dated 5 October 2026
Prepared by	Deepak Gupta

How to read this document

Each portal has its own section. Every screen is a heading, and every feature under it is one line. All of it is clickable in the prototype shared with you. The last section says what runs on sample data today and what the next phase adds.

Contents

1. The product in one page
2. Common to every portal
3. Student Portal
4. Parent Portal
5. Mentor Portal
6. Admin Portal
7. Current stage and next phase

1. The product in one page

Brainy Medic puts every student in a batch of up to 50 with one mentor, on a 90-day challenge that starts the day they join. Each day the admin's plan sets one task; the student does it, sees instant analysis, uploads proof, and the mentor verifies. Doing this daily builds a streak and earns points. Parents watch progress read-only. Everyone talks in batch rooms, doubt boxes and private messages, and announcements reach every portal.

The daily loop

- Admin plans Day 1 to Day 90 once and edits any future day.
- Student does the day's task: an in-app test, a paper test with upload, a reading task or a revision day.
- Instant analysis: score, batch rank band, batch average, percentile, weakest topics, question review.
- Student uploads a photo of the answer sheet.
- Mentor verifies, points land, streak continues. Sundays count; every 7th day is a lighter revision day.

Tests taken at the centre

- Mentor types the score (test type, maximum marks, obtained marks, date, test ID).
- Student analyses every wrong question on paper and uploads photos or a PDF.
- Mentor verifies the analysis; files are deleted after verification; points are awarded.
- Parent sees the test and marks as soon as the score is typed.

2. Common to every portal

Four portals share one brand, one login page and one 90-day challenge model.

Brand and look

- Brainy Medic name, BNM monogram logo on a white chip, teal and gold colours taken from the logo.
- Works on phone and desktop. Phones get a bottom navigation bar for each role.
- The admin can rename the app, change the brand colours and corner radius, and the whole product follows live.

Landing page

- Hero with the 90-day challenge message and three facts: 90 days from the joining day, one task every day including Sunday, no passwords for students and parents.
- The daily loop strip: admin sets the day, student does the task, instant analysis, upload proof, mentor verifies.
- Four doors: Student, Parent, Mentor, Admin.

Login page (one page, four tabs)

- Student: Student ID, then a 6-digit code sent to the student's email. No password.
- Parent: the same Student ID, then a 6-digit code sent only to the parent's phone on file, never to the student.
- Mentor: email and password.
- Admin: email and password, then a second-factor code every time.
- Wrong ID and Resend code links on the code step.

Console header, every role

- Logo, app name, role badge (Student console, Parent console, Mentor console, Admin console).
- Role navigation, the signed-in person's name and ID or batch, their photo or initials, and a Switch link.

The 90-day challenge model

- Every student runs Day 1 to Day 90 from their own joining date. Sundays count.
- Tasks are tied to the day number, not the calendar. A student who joins today starts at Day 1 of the same plan.
- Every 7th day is a lighter revision day. Every task shows both the day and the date, for example Day 34, Tue 22 Sep.
- Streak milestones at 7, 21, 45 and 90 days. One streak freeze earned per 15 days, at most three banked.
- Daily deadline 11:59 PM IST by default, changeable by the admin.

Chat, Announcements and Study room (shared layout)

- Three tabs on the Chat page in every portal: Announcements, Chat, Study room.
- Announcements: posts from the admin and mentors with text and an optional image; students only react (five reactions) and see counts.
- Chat: Discord-style rooms with name, role badge, time, day separators, a pinned message, highlighted @mentions, photo or PDF attachments. Enter sends, Shift+Enter adds a line.
- Study room: each batch's Discord room with link, hours, note and a Join on Discord button, set by the admin.

3. Student Portal

The student sees one thing first: today's task. Navigation: Home, Daily tasks, Chat, Rankings.

Home: header and summary cards

- Greeting by time of day; Day N of 90, mentor's name, batch name, Student ID; level badge (Rookie, Learner, Scholar, Topper, Legend).
- Streak card: animated flame, days count, days to the next milestone, freezes banked, best streak.
- Points card: total Brainy Points, progress ring to the next level, points still needed.
- Batch rank card: rank shown as a band such as Top 20% for anyone below the top 10, weekly score sparkline, last test % and average %.

Home: today's task card

- Day N and date, subject, task type (paper test + upload, in-app test, read and summarise, revision day).
- Title, instructions, duration, points available, closing time, live countdown to the deadline, Start now button.
- The four steps of the day and a preview of tomorrow's task.

Home: 90-day challenge grid

- 90 cells, one per day: done, missed, today, revision day, upcoming. Milestone days are starred. Day 1 date shown.

Home: rankings and progress

- Star performers: the top 3 students across every batch with mentor name, batch, points, streak and day.
- Batch leaderboard: the student's own batch top 10 with streak and points; top 3 highlighted; own row marked (you); the student's own band and points.
- Your week: sparkline of the last seven test scores, the two weakest topics, mistake-notebook count.
- Badges (earned and locked), points ledger (every point and why), mentor card with photo, subject, usual verification time, mentor streak and an Ask a doubt button.

Daily tasks: Daily task tab (five stages)

- Brief: task type, instructions, what can be earned today, Download paper, Start the warm-up.
- Test: MCQs with a timer, progress bar, Previous and Next, Submit test.
- Analysis: score ring, batch rank band, batch average, percentile, a one-line AI summary, question-by-question review with explanations.
- Upload: camera or gallery, up to six pages with previews, a pre-upload checklist, Submit proof.
- Done: streak now N+1, points earned by part (submitted, score, proof, tick pending), tonight's revision topics.

Daily tasks: Test analysis tab

- Lists every test taken at the centre that the mentor typed in: Test ID, type, marks out of maximum, percentage, date, and a three-step status (Score updated, Your analysis, Mentor verified). Count of analyses due on the tab.
- When a score is updated the student clicks pictures of the analysis or uploads a PDF or PNG (up to 8 files) and submits.
- A sent-back record shows the mentor's one-line reason and asks for a new upload.
- After verification: Verified, points earned, and a note that the uploaded files were deleted.

Chat

- Announcements from the mentor and the admin; react with one tap, no writing.
- Rooms: the batch group (students and mentor), All students + Admin, Physics Doubt Box, Chemistry Doubt Box, Biology Doubt Box, and a private direct room with the mentor for personal questions.
- Study room: the batch's Discord room with hours, note and Join on Discord.

4. Parent Portal

Read-only and built to be checked on a phone in ten seconds. Navigation: Home, Tests.

Login

- Student ID, then a 6-digit code sent to the parent phone on file. The code never goes to the student.
- The parent phone comes from the mentor's enrolment sheet or the single-student form.

Home

- Greeting, Read-only view with last-updated time and date, child switcher when one parent has more than one child.
- Child card: photo or initials, name, Student ID, batch, joining date, On track or Needs attention badge, 90-day progress bar with Day N of 90.
- Mentor card: mentor's photo, name, subject, qualification, Request a call button.
- Four tiles: today's task status with day and task name; streak and daily closing time; average test % with test count; tasks completed out of days elapsed.

Tests

- Table of every test: name, date, marks out of total, percentage, newest first, with a trend line of the last ten.
- Daily tests from the app and centre tests the mentor typed in (Test ID and type), marked analysis pending until the mentor verifies.
- Marks appear the moment the mentor confirms them.

90-day journey and settings

- The same 90-cell grid as the student: done, missed, today, revision, upcoming.
- Sunday summary on WhatsApp toggle, on by default. Ranks are not shown to parents.

5. Mentor Portal

The mentor verifies; the admin assigns. Navigation: Dashboard, Verify, Students, Chat, Profile.

Dashboard

- Header: batch name and nickname, date, the mentor's own streak. Buttons: Add students, Open verification inbox with the total waiting.
- Today's tasks card: students grouped by challenge day with each day's task and count; submitted, to verify and not started counters; Preview tomorrow; Remind those who have not started; Report a problem with a task.
- Four stat tiles: completion today, verified so far with turnaround, batch average test %, average streak.
- Batch heatmap: one tile per student by today's status (verified, submitted, not started, missed) with legend counts; hover for details; tap for a strip with day, streak, average, points, Profile and Nudge.
- Verification preview (three newest uploads with tick or send back), at-risk list with Message button.
- Mentor rankings: top 3 as gold, silver and bronze cards with average points per active student and total; ranks 4 to 10 as a table; own row highlighted; tie-break rule printed.
- Star performers across all batches; score distribution chart; Explain in class list of the three questions most students got wrong.

Verify: Daily tasks tab

- Queue with student, day, time, pages and an AI flag; progress bar of done this session.
- Answer-sheet viewer; AI pre-check warning for blurry pages or a wrong-task upload.
- Marks entry that accepts the student's self-marked score when left blank; feedback chips; note box.
- Tick (keyboard V) and Send back (keyboard S). Send back reopens the task until the deadline.

Verify: Test analysis tab (centre tests)

- Add Test Record: Student, Test Type, Maximum Marks, Obtained Marks, Test Date, Test ID (for example UT-27-03, PT-03, MOCK-01). Add Record, or Add and next student to keep the form open.
- Manage test types and maximum marks: add or remove options at any time (for example remove PHY Test, add Annual Test or 500 marks). Existing records keep their saved values.
- Records table filtered by To verify, Analysis due, Sent back, Verified and All: student, test, marks and percentage, date, status.
- Selecting a record shows the student's uploaded analysis. Verify analysis awards points and deletes the files. Send back needs one line on what to redo. Remind to upload for records still waiting.
- Download a batch report (PDF) and a per-student report (PDF) from this tab.

Students

- Seats filled out of 50 with a bar and seats left. Extra rows beyond 50 are rejected as batch full.
- Add one student: name, phone, email, parent name, parent phone, with the same checks as the sheet; the Student ID is emailed, the parent is messaged, Day 1 starts today.
- Add from Excel or CSV: downloadable five-column template; validation preview with Ready, Needs a fix, Will skip and the reason on each row; Enrol N and send Student IDs, or Re-upload.
- Roster: search by name, ID or email; day, ID, phone, activation (Active or Invited), streak, points, Resend invite; names open the profile.

Student profile (own batch only)

- Photo, name, activation, today's status, ID, batch, mentor, joining date, phone, email, parent name and phone, Day N progress bar, mentor photo.
- Actions: Download test-analysis report (PDF), Reset login, Excuse today.
- Tiles: streak, points, average test %, last test. 90-day grid, test history with trend line, last three uploads, private notes.

Chat

- Announcements: post to the batch with text and an optional image; see the admin's posts; everyone reacts.
- 54 rooms for a full batch: one private direct room per student (searchable by name), the batch group, Physics, Chemistry and Biology Doubt Boxes, and Mentors + Admin.
- Study room: the batch's Discord room as the students see it.

Profile

- Photo upload under 2 MB, cropped square and compressed; change or remove any time; shown in the header, to students, to parents and to the admin.
- Name and batch set by the admin; subject, phone for parent callbacks and a short bio are editable.
- Tiles: rank among mentors, average points per student with total, mentor streak, all-time verifications; journey timeline.

6. Admin Portal

The admin plans the 90 days, adds mentors, reads reports, runs announcements and study rooms, and controls every rule and label. Navigation: Overview, Task plan, Mentors, Chat, Customise.

Overview

- Date, number of mentors, students and the challenge length. Buttons: Add mentor, Open the 90-day plan.
- Six tiles: mentors (with how many verified today), students, active today, completion, verification turnaround, seats free.
- Today across the school: the five largest day groups with task title and count, distinct days in play, whether every test day has its paper attached; Check tomorrow's tasks; Push an announcement.
- Star performers (open the student's profile); Top mentors as gold, silver and bronze cards (open the mentor's profile).
- Mentor scorecard: photo, batch and subject, seats bar, 7-day completion sparkline and %, turnaround, average score, mentor streak, health badge (Healthy, Watch, Action).
- Alerts feed marked Action, Watch, Info or Win.

Task plan (the 90-day challenge)

- Tiles: days planned out of 90, papers missing, busiest day today, tomorrow's task.
- Week tabs (Week 1 to Week 13) showing seven days at a time.
- Per day: type (paper test + upload, in-app test, read and summarise, revision day), title, subject, minutes, points, paper attachment for tests, how many students are on that day today, Copy to next day.
- Save plan, Export CSV, Import CSV, and Push an extra task or announcement to every student today without changing the plan.

Mentors

- Count of mentors and students seated, with the 50-per-mentor rule.
- Add mentor manually: name, email, phone, subject, batch name; invite by email and WhatsApp. Import CSV of mentors.
- Reports table with a range picker: Last 7, 15, 30 or 90 days, or any custom from and to date. Columns: rank, completion trend and %, verified count, turnaround, average test %, streaks kept, at risk, and a per-mentor test-analysis PDF. Download as PDF or CSV.
- Each row opens the mentor's profile.

Mentor profile

- Photo, name, rank, streak badge, subject, qualification, batch, joining date, phone, email, bio; tiles for seats, verified, average points per student, total points.
- Actions: Download test-analysis report (PDF) for the whole batch, Replace photo, Edit details, Hand over batch.
- Report with the same range picker, six tiles and a daily completion chart; journey timeline.
- Batch students table: day, streak, average %, tests appeared, verified, points. Each name opens the student's profile.

Student profile (any student, through their mentor)

- Everything the mentor's student profile shows, plus Transfer batch and the per-student test-analysis PDF.

Chat

- Announcements to all batches or one batch, with text and an optional image. The admin can delete any post.
- Rooms: Mentors + Admin, and All students + Admin. Mentors are not in the student room.
- Study rooms: one Discord link, hours and note per batch, changeable at any time; students and mentors see the change immediately.

Customise

- Branding: app name, short name, tagline, logo by URL or upload, four colour presets, primary, deep and accent colour pickers, corner radius, live preview.
- Labels: rename Admin, Mentor, Student, Parent, Batch, Daily Task, Challenge, Brainy Points and Streak.
- Points: every value in the economy including the test-analysis reward, rank 1 to 3, perfect week and the 7, 21, 45 and 90-day milestones; level names and thresholds.
- Streaks and challenge: challenge length, revision day every N days, maximum items per day, submission versus verification, freeze earn rate and cap, comeback restore %, late window, late credit, milestones.
- Schedule: daily deadline, publish-by time, early-bird cut-off, timezone, seats per mentor, rest days.
- Features: task types mentors can see; WhatsApp, AI verification assist, doubt threads, teams, seasons, rewards catalogue, parent digest, Hindi interface.
- Messages: welcome, deadline reminder and verified templates with placeholders and a live preview. Export JSON, Import JSON, Reset to defaults.

7. Current stage and next phase

Every screen above works and can be clicked through, on sample data frozen at 22 September 2026. Nothing is saved to a server yet.

Sample today

- Logins accept any Student ID, email or code. No real accounts exist.
- Four batches, 167 students, four mentors, one parent with two children and a 90-day plan are generated sample data.
- Emails, WhatsApp messages, reminders and nudges show a confirmation on screen but are not sent.
- Uploads, chat messages, announcements, test records, settings, study-room links and the mentor's photo live in the browser only.
- PDF reports are real files generated in the browser from the sample data.

Next phase (backend)

- Real login with codes by email and SMS or WhatsApp, admin second factor.
- The database behind every screen with batch isolation enforced server-side.
- Nightly close of the day: streak and points calculation, reminders, alerts.
- File storage for answer sheets, photos and analysis uploads, with deletion after verification.
- Live delivery of chat, announcements and reactions between devices.
- Certificates at Day 90, rewards redemption, doubt threads, teams, seasons, Hindi interface.
